

## **Social Movements and Internationalism in Our America by José Seoane, Emilio Taddei and Clara Algranati**

*Social Movements and Internationalism in Our America. The cycle of conflict and socio-political changes to the current neoliberal offensive*

The reflections that compose the present book begin precisely by examining that moment of Our America and those experiences forged by subaltern subjects in our region; particularly, by the most dispossessed and punished; where this precarization of life, contrary to what certain colonial schemes propose, was very far from meaning similar poverty of dreams, dignity and courage.

The articles in this volume follow analytically the route of these subjects, of their practices and of the changes experienced by their conflict throughout different periods and cycles of struggle.

*The book is in spanish.*
